PROFESSIONAL SUMMARY

Motivated web development student with hands-on experience building responsive and full-stack web applications using HTML, CSS, JavaScript, TypeScript, React, C#, .NET, and the MERN stack. Passionate about creating clean, user-focused interfaces and continuously learning modern software development practices. Strong foundation in frontend design, backend development, databases, and cloud deployment.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C#, SQL
Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap
Frameworks/Libraries: React, Node.js, Express.js, .NET MVC
Databases: MongoDB, SQL Server
Tools & Platforms: Git, GitHub, Visual Studio Code, Visual Studio, Azure, Google Cloud, Postman

PROJECTS

Issue Tracker Application

Built a full-stack issue tracking system that allows users to create, update, assign, and manage software bugs through a secure role-based interface. Implemented responsive UI design and RESTful API integration.

Technologies: React, TypeScript, Node.js, Express.js, MongoDB

.NET Bookstore Application

Developed a database-driven bookstore web application with product management, customer browsing, and structured backend architecture using MVC principles.

Technologies: C#, ASP.NET MVC, SQL Server, Bootstrap

RSS News Aggregator

Created a responsive web application that aggregates news from multiple RSS feeds and displays content in a clean, user-friendly interface.

Technologies: HTML, CSS, Bootstrap, JavaScript

EDUCATION

Ranken Technical College

Associate of Application & Web Development

Relevant Coursework:

- Web Development Technologies
- Programming Fundamentals with C#
- Database-Driven Web Development (MERN Stack)
- Database-Driven Web Applications II (.NET MVC)
